# Jehan Engineer

## Senior Software Engineer

Bengaluru, India | +91 8971915776 | jehanke8@gmail.com | LinkedIn

## SUMMARY

Senior Software Engineer with 5 years of full-stack experience at Lowe's India building scalable enterprise web applications, microservices, and distributed systems using React, JavaScript, Spring Boot and Java. Strong in designing high-volume frontend architectures, event-driven data pipelines, and maintainable APIs with a focus on reliability, performance, and cost efficiency. Comfortable owning complex systems end to end, from technical design, development and code reviews to automated testing, production observability, and integrating LLM capabilities into developer workflows.

## TECHNICAL SKILLS

| | |
|---|---|
| **Languages** | **Java**, **JavaScript**, **TypeScript**, **SQL** |
| **Frontend** | **React.js**, **Next.js**, **Redux**, HTML5, CSS, React Router, **AG Grid**, **Storybook**, Micro Frontend Architecture |
| **Backend** | **Spring Boot**, **Spring Batch**, Hibernate/JPA, REST APIs, GraphQL, Microservices, **Apache Kafka**, Event-Driven Architecture |
| **Databases** | **PostgreSQL**, MySQL, MongoDB, **Redis** |
| **DevOps & IaC** | **Docker**, ArgoCD, Jenkins, CI/CD, Vercel |
| **Observability** | Grafana, Prometheus, Kibana, Session Replay |
| **Quality & Security** | **Cypress**, Playwright, Jest, JUnit, Mockito, Snyk |
| **AI** | LLM integration (Claude, GPT, Gemini), GitHub Copilot |
| **Tools & Practices** | Git, GitHub, Bitbucket, Jira, Confluence, Agile/Scrum, System Design, Code Reviews |

## PROFESSIONAL EXPERIENCE

**Lowe's India** **Jun 2026 – Present • Software Engineer (Sep 2023 – May 2026) • Assoc (Aug 2021 – Sep 2023)**

**Senior Software Engineer**

- **Spearheaded the modernization of legacy supply chain operations**, collaborating with UX teams to integrate **optimized components** and engineering a **nested infinite-scrolling** and **asynchronous data-loading architecture** for high-volume data tables, eliminating redundant re-renders and cutting load times.
- **Implemented caching layers and code optimizations** across frontend **React** views and backend **Spring Boot** microservices for multiple workflows and tools, reducing API response latency and lowering infrastructure costs.
- **Established real-time observability and client-side telemetry pipelines** by building **Grafana dashboards** and integrating user **session replay**, clickstream analytics, and automated error reporting during promotional and incident response events.
- **Led end-to-end full-stack delivery** of enterprise inventory allocation and regional stock management platforms, building **Spring Boot** search and filter microservices, resolving multi-tier SKU hierarchy defects, and engineering modular **React** interfaces.
- **Developed high-throughput event-driven microservices** using **Spring Boot and Apache Kafka** for automated supply chain replenishment, integrating **PostgreSQL** for transactional persistence and **Redis** distributed caching to accelerate read-heavy inventory lookups and reduce database load.
- **Drove automated testing and security compliance** across enterprise repositories, implementing **Cypress** and **Playwright** E2E test suites, institutionalizing a team-wide performance testing suite, and remediating **Snyk** security vulnerabilities.
- **Mentored junior engineers and led cross-team technical initiatives**, conducting workshops on automation testing, **session-replay debugging**, and modular UI design while coordinating multi-team migrations.
- **Developed responsive enterprise web interfaces** and reusable **Storybook** component libraries using **React, Redux, TypeScript**, and React Router, integrating third-party libraries and RESTful backend APIs while maintaining test suites with **Jest** and **Cypress**.

## PROJECTS

**Conversational AI Chatbot Platform** **Live App (Vercel)**

- **Architected and developed a full-scale conversational AI application** integrating **Google OAuth** for secure user authentication and session management.
- **Integrated the Google AI API** to stream context-aware model responses, implementing robust error handling, rate-limiting, and responsive UI components.

**Developer Portfolio & Web Application** **Live Portfolio (Vercel)**

- **Engineered a high-performance personal portfolio** and interactive web application using **React, JavaScript, and CSS**.
- **Optimized client-side rendering**, accessibility, and asset delivery, deploying with automated CI/CD pipelines on **Vercel**.

## EDUCATION & ACHIEVEMENTS

**New Horizon College of Engineering, Bengaluru (VTU)** — B.E., Computer Science & Engineering | CGPA: 8.93 (2017 – 2021)

- **Received 2 Individual Excellence Awards, 3 Team Excellence Awards** and VP-level leadership recognition at the Annual Technology Town Hall for end-to-end ownership of critical supply chain platforms.
- **Earned top performance ratings** delivering 450+ production code contributions across enterprise repositories in a single year.
